After paying all the expenses of the state insane asylum applicable for 1992 there will be an unused and undrawn balance of the appropriations made two years ago of about \$23,000. This is an extremely gratifying showing, and one which other states boards would do well to follow. It shows that the board of insane asylum commissioners has earnestly striven to subserve the interests of the state in preference to using the money simply because it was appropriated. The average daily cost for care and treatment of each patient for the blennial period was \$2.7 cents, a small increase over the preceding two years, due to the advanced prices of commodities. The detached wards or cottages, for which the sum of \$18,800 was appropriated at the last session, have been erected and have been in use for more than a year. At the end of the last blennial period there were 314 patients in the asylum: now there are 350, an increase of thirty-six patients in two years. At the close of 1904 it is estimated there will be \$30, and the buildings as they now are will not properly accommodate to exceed \$25 patients. The condition cells for speedy relief.

It is urged by the board that the present law governing the asylum has become antiquated, is not applicable to
